

# Sanitary Sewer

# Repair Project

## CONSTRUCTION UPDATE

Dear Aurora Water Neighbor,

After a short pause in the repair of the sanitary sewer—to assess additional work identified during the project's last inspection—BT Construction is back on Eastman Avenue to complete construction. This final phase is expected to take about three to four weeks to complete. Once finished, the upgraded sewer line will provide more reliable service and long-term benefits for the neighborhood.

Typical construction hours will be Monday through Friday, from 7 a.m. to 5 p.m. Occasionally, work hours may be extended to finish specific tasks, and Saturday work may occur if needed.

If this phase of the project requires temporary disruptions to your sanitary sewer services while the contractor connects and disconnects homes to alternate services, a team member will hang a notice on your front door 24 hours in advance.

Also, our crew will make every effort to maintain access to all homes within the construction area. If street parking needs to be restricted, "No Parking" signs will be posted ahead of time. Please ensure vehicles are moved out of the marked work zone by 7 a.m. to avoid towing.

We understand this work is taking place in a residential neighborhood, and we're committed to finishing quickly, safely, and with as little disruption as possible. With school back in session, please drive slowly, avoid fenced-off areas, and stay alert around construction to help keep students, neighbors, and our workers safe.

We appreciate your patience and understanding while we complete this important infrastructure project. If you have any questions or concerns during construction, our staff will be available to help.
